Durable Precision

Stryker Endoscopy brings to market the premium line of arthroscopic manual instruments: Conquest™. Designed for a broad range of applications, Conquest™ instruments meld world-class craftsmanship with unparalleled technical precision. Stryker offers a complete line of 40 instruments including Punches, Scissors, Graspers, and Small Joint Instruments.

Manufactured to the tightest tolerances of Electrical Discharge Machining, Conquest™ tips cut with precision, case after case.

Milled from a solid piece of hardened steel and coated in chromium for increased protection, Conquest™ moving parts boast exceptional strength yet provide fluid motion when cutting or biting.

Ergonomically designed to minimize fatigue, Conquest™ handles cut with greater ease and power.

Conquest™ Punches

These instruments are available in a variety of tip configurations to accommodate varying needs. Stryker engineers have designed these instruments with teeth that allow the surgeon to smoothly pull tissue into the jaws of the instrument, providing safe and precise resection.
